Sparkling Science Programme Facts & Figures: condensed version

Basic Data

299 funded projects¹, all already completed.

RESEARCH PROJECTS

Budget	34.7 million euros
Number of funded Research projects	245
Average project duration	almost 28 months
Funding quota (1,129 applications)	22 %

SCHOOL RESEARCH PROJECTS

Budget	194,500 euros
Number of funded school research projects	54
Average project duration	15 months

¹ Within the scope of the 1st to the 3rd call there were two funding schemes. In both cases the projects were implemented as a collaboration between science and schools. Research projects were much more extensive and methodologically more complex, and the project was led by a research institution. School research projects were much smaller and methodologically less complex, the participating school was responsible for the project management.

PROJECTS BY RESEARCH FIELDS

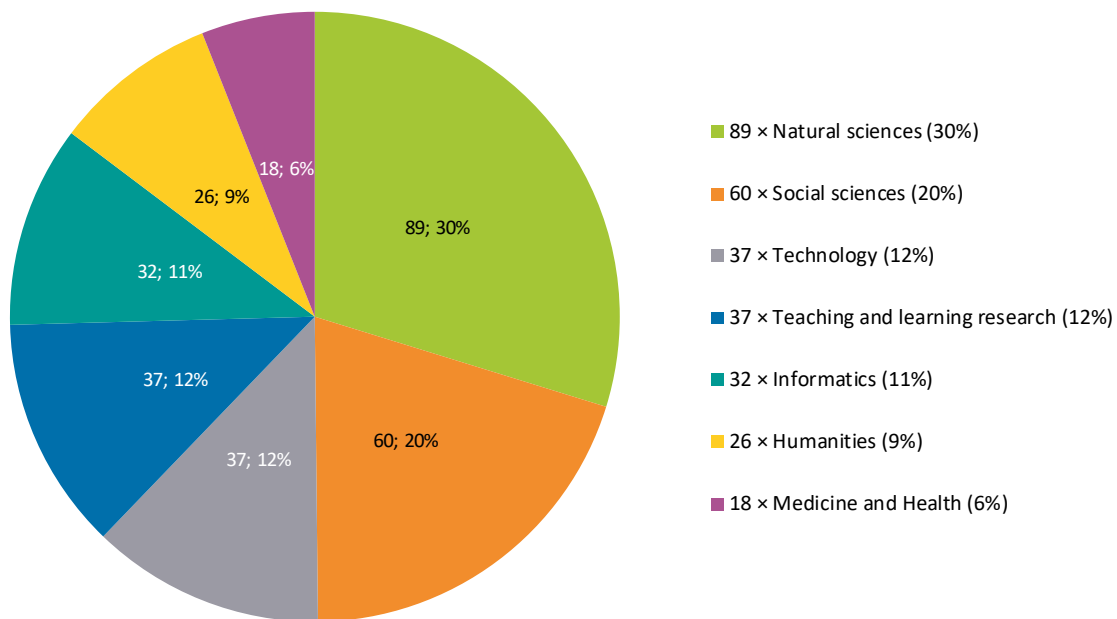

Figure 1: Projects by research fields

Overview of the involved institutions and persons

200 research institutions, of which 64 international ones,

65 universities, of which 44 international ones

12 universities of applied sciences, of which 3 international ones

10 universities colleges of teacher education

111 non-university institutions and scientific associations, of which 17 international ones

2 networks

185 partners from economy and business as well as society,
of which 9 international ones

535 schools and school centres, of which 46 international ones

107,948 involved persons

101,074 pupils, of which

33,320 directly involved,

of which 15,791 (47 %) female pupils and 17.529 (53 %) male pupils,

of which 4,999 with migration background

67,727 indirectly involved

4,251 researchers and students (53 % female, 47 % male), of which

408 female scientists and 524 male scientists and

1,839 female students and 1,480 male students

2,623 teacher and prospective teachers (55 % female, 45 % male), of which

603 female teachers and 487 male teachers and

843 prospective female teachers and 690 prospective male teachers
